EDUCATION

Nanyang Technological University

Bachelor of Computing in Computer Science

Expected Honours (Highest Distinction), Current CGPA: 4.51/5.00

Singapore

Aug. 2024 – May. 2028

SKILLS

Languages: Python, JavaScript, Java, C++, HTML/CSS, TypeScript, SQL, Bash, Cypher

Frameworks: React, Node.js, Next.js

Developer Tools: Git, Linux, Google Cloud Platform, MongoDB Atlas, VS Code, Visual Studio

Databases: MongoDB, PostgreSQL, Neo4j

Libraries: pandas, NumPy, Matplotlib

EXPERIENCE

Undergraduate Research Assistant

Nanyang Technological University

Aug. 2025 – Present

Singapore

- Developed features for SIERRA, a visual query interface for property graphs using React, Neo4j, Cypher and Docker.
- Built React front-end components for new features with emphasis on interactive and intuitive data visualization.
- Implemented Cypher graph query builders in Neo4j to support advanced graph operations and integrated them with backend services.
- Collaborated with faculty to define requirements and translate them into technical features enhancing graph data exploration.

PROJECTS

Lilian Discord Bot | Javascript, Node.js, npm, discord.js, Git | GitHub

June 2023

- Developed a multi-function Discord bot with moderation tools, interactive games and social features.
- Deployed using Render to 100+ active servers with 500+ monthly active users.
- Achieved manual verification by Discord, meeting platform trust, security, and quality standards.
- Integrated external APIs to deliver real-time content within Discord.

TransitSG | React.js, JavaScript, Python, FastAPI, Uvicorn, PostgreSQL

September 2025

- Designed and documented a complete public transport management system featuring real-time crowdedness tracking, trip cost estimation and downtime announcements.
- Built a least-crowded route finder that reduced user exposure to congested stations by prioritizing low-density MRT and bus routes using live and forecasted crowd data.
- Engineered admin-side data visualization features such as issue heatmaps and system health dashboards to improve system monitoring and response time.

Portfolio Website | Javascript, HTML/CSS | GitHub

May 2025

- Developed a website template from scratch to showcase projects and skills in an interactive layout.
- Built the site with responsive design, intuitive navigation, polished UI/UX and device compatibility.
- Added live widgets to showcase real-time statistics and made custom animation templates using Javascript.

CERTIFICATIONS

- Associate MongoDB Node.js Developer (C100DEV)
- Github Foundations
- FreeCodeCamp Scientific Computing with Python
